## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1, 3-7, 9, 12-17 and 19 allowed.

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 10 rejected under 35 U.S.C. 103(a) as being unpatentable over Kobayashi et al. (JP 64-064318) in view of Cadien et al. (5,604,158) further in view of Nishida (4,927,786).

Regarding Claim 10, Kobayashi et al. disclose a manufacturing method of semiconductor device where in substrate 1, tungsten silicide film 5 and tungsten film 6 and electrode 7 of aluminum. Kobayashi et al. fail to disclose the tungsten plug and the required deposition chamber/tungsten coil. However, Cadient et al disclose an integrated tungsten/tungsten silicide plug process where in Fig. 3c tungsten plug is labeled as 308. Furthermore, Nishida et al. disclose a process for semiconductor device manufacture where in Fig. 4, 403 is tungsten coil and 406 is deposition chamber.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required tungsten plug and deposition chamber/tungsten coil in Kobayashi et al. as taught by Cadien et al. and Nishida, in order to have a semiconductor device with increased reliability.
